How fast your training pays for itself

One hour, more students. Here is the group class math for a certified My Music Box teacher.

Your investment

- **Book 1 training: $2,200 founding price (standard $2,800)**
- **Annual license: first year free, then $499/year**
- **Payment plans available at checkout**
- **Teach as soon as you are certified on Book 1**
- **Group classes of 4 to 8 students**

Spread your training over monthly payments, so your first group class starts paying you back before you finish paying.

How fast your training pays back

- **1 private hour: $60 to $80**
- **1 group hour with 4 students: $120**
- **1 weekly class of 4: $480/month, paid back in about 5 months**
- **1 weekly class of 6: $720/month, paid back in about 3 months**
- **2 weekly classes of 6: $1,440/month, paid back in under 2 months**

These examples assume each student pays $30 for a one hour group class, about half of a private lesson or less, so families save while you earn more per hour.

Book 1 runs about 22 weeks with your students. Every new group you open brings your payback date closer.

Examples only. You set your own tuition and schedule. Monthly figures use 4 weeks per month and do not include the $120 student book set, which each student needs.

From year two, the $499 annual license works out to about $42 a month.
